DETAILED ACTION

Claim Objections

Claim 1 objected to because of the following informalities: "a LED die" should be "an LED die". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

PGPub 2005/0127543 to Rickering et al. Rickering teaches an optical device comprising:

a light-guiding body 21 having a light input surface (where an LED 41 with a light emitting chip 6 is located), a light emergent/output surface 22, and a light path inherently therebetween since the optical device is made to output light generated from the LED;

a paraboloidal-curved reflector surface 25 for the LED, at the focus of which is located the LED chip;

the paraboloidal-curved surface 25 can be provided with a opaque coating.
